

NATO Armed Forces - use The Jerven Bag.

A soldier, who is dry and warm, performs better than one, who is wet and cold. Good tools make for half the job, and it would then be too bad, if our soldiers should not have just as good an equipment as Norwegian hunters do. It began slowly, with various special units. But now, the Military is in a historic change, where its being emphasized, that Norwegian soldiers shall have the best of education, the best training and the best equipment there is.

The number of soldiers is being greatly reduced, but the ones remaining shall be among the best in the World. And they are! Multinational forces meet, through commissions in various uneasy corners of the World. This way our allied within NATO has also opened their eyes for The Jerven bag. Both the Danish, Swiss, and the French special units have so far taken The Jerven bag in use.

Experienced mountaineers, and now we mean experienced, are of the opinion, that The Jerven bag ought to be just as mandatory an equipment in backpacks as the life jacket is in boats. Whatever. The Jerven bag is placed under the seat in the fighter plane F-16. Oh no, not as a parachute. As rescue equipment. It might happen, that the pilot would have to catapult.

And if you then land, in inhospitable areas - far from people – in nasty and cold weather.....
